DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 16, 18 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Campbell, British Patent 106,866. Campbell teaches a display device comprising stationary images mounted on a backboard 1, a slit-board 3 spaced in front of and parallel to the backboard, and a moving viewer 6 spaced from the slit-board. As the viewer moves pass the device a virtual picture or image is produced. The image can appears stationary or in motion relatively the observer. Campbell teaches that the virtual picture/image P is equal to the distance of the observer from the background 1 and the quotient of the actual width of the picture and distance between the background 1 and screen. $P/p=D/d$. Page 3, line 8-12.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Campbell in view of Ladislav, French Patent 1029300. Ladislav teaches a display device comprising stationary images f mounted on a wall, a slit-board g spaced in front of and parallel to the backboard, and a moving viewer 6 in a train spaced from the slit-board. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the display device taught by Campbell along a train track as taught by Ladislav to enhance the view of the passengers on the train.

Allowable Subject Matter

5. Claims 19-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 1-15, 24-25 allowed.

Response to Arguments

7. Applicant's arguments filed January 12, 2006 have been fully considered but they are not persuasive. The applicant argues that the invention as claimed requires that the width of the slits in the slit board be selected to be at most one-tenth of the width of the images in order to project images substantially without blurring. The applicant points out that British Patent to Campbell specifies that the slots may have a width of 2 inches and the image a width of 15 inches, corresponding to a slot width to image width ratio of approximately 0.133. The 0.133 ratio is greater than the claimed 0.1 ratio.

8. The examiner contends the applicant does not positively recite the slot width being at most one-tenth the image width. Claim 16, line 30 reads "said slit width is selected to be at most about one-tenth of said actual image width. The examiner contends that the slit/slot width of the device taught by Campbell is "about one-tenth" the width of the actual picture.

9. The rejection is maintained.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
